EDUCATION

B.Sc. in Computer Science (2023 – 2027)

EXPERIENCE

Software Engineer
Grupo Boticário S.A, 2024 - Present

Currently, I am a Senior Software Engineer leading the design of scalable microservices with DDD and Clean Architecture. I manage AWS infrastructure with GitOps and CI/CD practices, while also defining RFID serialization architectures and integrating industrial middleware for large-scale deployments.

Software Engineer
Lojas Renner S.A, 2021 -2024

I led the development of projects such as Omni Sale and Self-Checkout, focusing on microservices in AWS, RFID and SSO integrations. I developed solutions with React, React Native, Node.js, and GraphQL, streamlining checkout processes, reducing queues, and enhancing the in-store shopping experience.

Software Engineer
Agibank, 2019 - 2021

I worked as a Software Engineer delivering banking applications and SPAs, leveraging NestJS to build Backend-for-Frontend systems that reduced sprint development time. I also implemented PIX payment integration, significantly improving transaction speed across Brazil.

SKILLS

- Backend: Node.js, Nest.js, GraphQL, AWS,.Net Docker, Kubernetes, DB
- Frontend: React.js, React Native, Vue.js, HTML, CSS
- Soft Skills: Leadership, collaboration, software design, operational efficiency
